Virtual Engagements

Geniecast knows that conversations are better than lectures. No matter the technology platform, back and forth communication is what makes our Casts amazing.

Geniecast provides experiences unlike any other by pairing our access to top-tier talent, celebrities, and world-famous speakers with the ability to interact with them in ways that could be considered...magic.

Be it in-person or through technology, dialogue is at the core of what we do. Our APiR™ technology puts speakers on stage to interact with audiences in stunning augmented reality.

Our connected platforms allow interaction through desktop and mobile video in ways that audiences can find more captivating than real life.

We produce an environment where physical and digital objects co-exist in real-time, and the result is conversations that amaze, delight, and excite.
